## PROFESSIONAL SUMMARY

---

Results-driven full-stack developer with proven experience creating end-to-end web solutions from concept to deployment. Successfully designed and implemented a complete restaurant website featuring cart functionality and automated checkout processes using HTML, CSS, Javascript, and Node.js. Currently developing a sophisticated learning management system utilising Next.js, TypeScript, JavaScript, and Java with seamless database integration. Skilled at independent project management and problem-solving with expertise in leveraging AI tools to enhance development efficiency. Seeking opportunities to apply my technical versatility across computing, data analysis, and cybersecurity sectors.

## EXPERIENCE

---

### Web Developer

Sidedish Foods, Kano (Remote)

I created a website for the restaurant so clients can order food, and staff can track orders and monitor their goals.

- Helped in deployment of the website using free, sustainable tools.
- I manage the website for now.
