EDUCATION

Nigerian University of Technology and Management (NUTM)

2024 – Present

BSc in Cybersecurity Science

In Progress

WORK EXPERIENCE

Hashebi Construction

Jan 2026 – Feb 2026

Contract Web Developer

Remote

- Designed and delivered a full production corporate website in **Next.js, TypeScript, and App Router**, independently managing requirements, development, and Vercel deployment within a tight contract window. [cite: 10]
- Built a component-first, responsive frontend with strong visual hierarchy and clean, maintainable code meeting production-quality standards. [cite: 11]
- Managed the complete project lifecycle solo: from brief and architecture through to testing, documentation, and live deployment. [cite: 12]

VoicePatchesConsult

2025 – Present

Frontend Web Developer

Remote

- Developed a professional therapy and consultation platform from scratch using **Vanilla JavaScript, HTML, and CSS**.
- Focused on accessibility and clean user interfaces to ensure a seamless experience for clients seeking mental health services.
- Optimized performance and ensured high responsiveness across all mobile and desktop devices.

Klo's House of Fashion

Aug 2025 – Present

Frontend Developer

Remote

- Built a mobile-first e-commerce platform using **HTML, CSS, and JavaScript** with structured product browsing, collection pages, and a brand-aligned UI. [cite: 16]
- Developed a reusable component library ensuring design consistency and scalability across the product catalogue. [cite: 17]
- Continuously shipping UI improvements and new features post-launch based on iterative client feedback. [cite: 18]

Sidedish Foods

2025 – Present

Full Stack Developer

Remote

- Built a full-stack restaurant platform from scratch: customer-facing menu browsing, cart system, ordering workflow, and an internal analytics dashboard for management. [cite: 23]
- Integrated RESTful APIs to handle ordering logic, data flow, and operational reporting between frontend and backend services. [cite: 24]
- Maintained and expanded the platform post-launch, resolving bugs and delivering new functionality as business requirements evolved. [cite: 25]

PROJECTS

Hashebi Construction | Live

Next.js | TypeScript | TailwindCSS

- Delivered a responsive, performant corporate portfolio site with clean component architecture and full cross-device compatibility. [cite: 38, 40]

VoicePatchesConsult | Live

JavaScript | HTML | CSS

- A fully responsive consultation website built without frameworks, demonstrating strong fundamentals in web layout and interactive elements.

What's Next | Live

React | Django | PostgreSQL | Gemini API

- Built a full-stack AI-powered SaaS platform from zero as sole engineer: React frontend, Django REST backend, PostgreSQL, and multi-API integration. [cite: 33]
- Implemented prompt engineering and structured output validation to ensure reliable, production-safe AI responses. [cite: 34]

Sidedish Foods | Live

JavaScript | Node.js | HTML | CSS

- Built a full-stack ordering and analytics platform with JSON-driven data integration and an internal dashboard for business performance tracking. [cite: 42]

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, JSON, XML, jQuery [cite: 44]

Frameworks & Libraries: React.js, Next.js, Node.js, Django, TailwindCSS, Framer Motion, Bootstrap [cite: 44]

Backend & APIs: Django REST Framework, RESTful API design and consumption, JSON/XML data handling [cite: 44]

Databases: PostgreSQL, MongoDB, Supabase, MySQL (familiar) [cite: 45]

Tools & Platforms: Git, GitHub, Vercel, Render, Postman, Chrome DevTools, Docker (familiar) [cite: 46]

AI-Assisted Development: GitHub Copilot, Claude Sonnet/Opus, GPT, Gemini, Google Stitch, Google AI Studio [cite: 47]
